

South West Peninsula School of General Practice
(<http://primarycare.peninsuladeanery.nhs.uk>)

Train in one of the most beautiful areas of the UK and become part of our school which is consistently ranked as one of the best in the GMC NTS.

We have five training programmes: Exeter, Plymouth, Torbay, North Devon and Cornwall. Each has their own unique characters (Training Programme Directors!) and all deliver high quality training and support. Some programmes attract enhanced payments for training (TERS). Each is supported by a variety of training practices offering experiences in rural and inner city practice. GP training has a high profile in the south west with an active training community which is aware of its responsibilities to trainees and patients and which is continually refreshed by new GPs who have trained locally. So, quality of training really matters to us.

As a trainee you will have an opportunity to apply for our Scholars programme, which provides an additional 20 days (that's one session a week) to the ST3 year and which will enable you to develop leadership and management skills. We also offer an additional one year of training through our Leadership and Excellence Extension of Training (LEET) programme which offers a further opportunity to engage in project work on a topic which is current and relevant to primary care for half of your training week, the other half being clinical. We also offer the Global Health programme and a Quality Improvement Fellowship.

There is so much Moor to Sea in the Peninsula. Get your work/life balance right-relax and have fun walking, riding, surfing, sailing and so much more.

Don't miss out!
